NOTES

Mon Protocole products line

Mon Protocole Face and Body products are handcrafted in France. They are designed using organic and permaculture ingredients. They are genuine living preparations based on plants and flower essences. Our suppliers are independent breeders, pickers and pressers, all of whom are extremely respectful of the cycles imposed by nature. In every stage of production: from natural seed to maceration, including hand-picking. They distill their own plants without adding alcohol, and their production respects what nature has to offer. The active ingredients are carefully selected and concentrated. They provide the nutrients cells need for optimal protection. This is a 100% natural line of powerful, subtle skin care products.
